NOTHING LESS  
JUST THE BEST!

Nothing less - just the best!

# Key features

## Design

Design-concept specially designed by one of the best Italian designer - Nicola Zanetti.

## Simple control

Simple control panel allows you to prepare quickly the desired coffee beverage with one click.

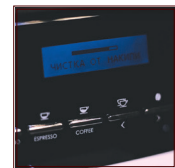

## Brewing unit

The variable brewing unit holds between 7 g and 14 g of coffee powder. This volume allows you to prepare 2 cups of coffee per one brewing cycle.

## Maintenance

All coffee machines have automatic cleaning program when you turn on/off the machine, brewing unit cleaning from coffee oils and descaling system.

# Key features Kaffit.com Nizza Autocappuccino

## Automatic milk frother

Automatic milk frother has 2 functions - frothing and heating milk. It gives a possibility to prepare cappuccino, latte, latte macchiato or a cup of hot milk with one touch of the button, without replacing the cup.

## The simple control

The simple control panel has a range of buttons that allows you to prepare quickly your coffee drinks, by pressing one button, and change the strength and volume of a coffee drink during its preparation.

## Coffee pre-brewing

The function of pre-brewing allows you to prepare a beverage with a richer taste and aroma. This function can be activated or deactivated by the user at will.

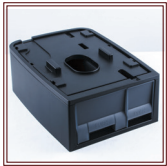

# Key features Kaffit.com Pro

## High speed making beverages

Two thermo blocks speed up the process of making drinks with milk.

## Enlarged coffee grounds container

The container for coffee grounds is 75 portions and the drip tray of the volume of 2 liters allow you to save maintenance time.

## Big beans container

The volume of beans container is 750 grams, that allows you to prepare 100 cups and you do not need to fill beans often.

## Additional connection to the big water tank

This system allows to collect water for making coffee not only from the basic water tank, but also from any other tank with bigger volume.
